

# Introducing the All New 2016 Miata!

## The new "ND" body Style

Check out the All New MX-5 Miata which Mazda is bringing out for the model year of 2016! It will have upgraded styling and design inside and out, plus a new direct fuel injection, high compression, 2 liter SkyActive motor! Notice they are going back to a 4 lug 17" wheel also. Mazda is not revealing a lot of details yet, they are being very secretive! I hear more info is to be available mid May of 2015, and possibly orders being taken by mid Summer 2015. I read two transmission choices will be 6 speed manual plus a paddle shift automatic. So far I read there will be a shade of red called "Soul Red" and a shade of white color being available. No mention yet of other colors or a PRHT. Stay tuned, and check Miata.net for more details. Look at the flowing yet aggressive lines! It looks like another Winner to me!

Zoom-Zoom, Bill Latsha
